

The Total Economic Impact™ Of Red Hat OpenShift Cloud Services

Through six customer interviews and data aggregation, Forrester concluded that Red Hat OpenShift cloud services has the following three-year financial impact.

FINANCIAL SUMMARY

ROI

468%

NPV

\$4.08M

PAYBACK

6 months

Reduced average development time per application by **up to 70%**

Recouped 20% of developer time from elimination of previous **infrastructure maintenance work**

Increased operational efficiency by **50%**

“For us, the direction is to be fully supported by a partnership [with Red Hat OpenShift cloud services], so we can concentrate on the core of our business. Our core is education. And education is supported by infrastructure, but I’m not in the business of the technology.”

Project coordinator, higher education

“With Red Hat OpenShift cloud services, business gets features faster. We are more flexible in setting up a new application or new models faster because it’s less code to get started.”

Developer for IT product and sourcing, apparel

SUMMARY OF BENEFITS

Three-year risk-adjusted

Development velocity

\$1.5M

Offloaded infrastructure management

\$2.1M

Operational efficiency

\$1.3M
